

AMP Technology Practice Tests

Demonstration Video Information

All videos are available at the below links via Google. We recommend downloading the videos instead of streaming them to protect bandwidth usage.

These AMP demonstration videos are available to support the use of the AMP Technology Practice Tests (TPT):

- **Navigation, gr 3-10**—This demonstration video is for all AMP tested grade levels and is designed to help users understand different ways students are able to navigate through an AMP computer-based assessment. Users will see the question status bar, the back/clear/next buttons in action and learn how to review and end an assessment.

- **Accessibility Tools, gr 3-10**—This demonstration video focuses on Accessibility Tools available to identified students in grades 3-10 for both the ELA and Mathematics assessments. The video is designed to help users familiarize themselves with some of the different Accessibility Tools available to students with a documented need via a Personal Needs and Preferences Profile (PNP)*. The PNP users will see the text-to-speech, masking and auditory calming accessibility tools in action in the context of a technology-enhanced test item.
